

RUI (RACHEL) HU

Technical Support | IT Support | Incident Troubleshooting

Calgary, AB | 587-836-9310 | hurui.lcy@gmail.com | GitHub: github.com/rachel-lcy

Portfolio: porfolio-five-rho-81.vercel.app

PROFESSIONAL SUMMARY

Technical Support-focused professional with hands-on experience troubleshooting user-impacting issues across web applications, APIs, and cloud environments.

Skilled in diagnosing issues such as login failures, access permission problems, API errors, and environment mismatches (local vs. production). Strong in root cause analysis (RCA), incident resolution, and communicating technical solutions clearly to non-technical users.

Currently building practical experience in Microsoft 365 and Entra ID (Azure Active Directory), including user account management, access control, and identity-related troubleshooting.

Brings a hybrid background in development and support, enabling efficient troubleshooting, user-focused problem solving, and reliable follow-through from issue identification to resolution.

CERTIFICATIONS

- ITIL 4 Foundation — Certified (Incident, SLA, Service Management)
- AWS Certified Cloud Practitioner (CLF-C02)
- AWS Certified AI Practitioner
- AWS Solutions Architect – Associate (SAA-C03) — In Progress
- Meta Front-End Developer Professional Certificate (Coursera)

TECHNICAL SKILLS

IT Support & Incident Management

Incident Lifecycle, Ticketing Systems (Jira Service Management, ServiceNow - basic), SLA, Escalation Handling

Systems & End-User Support

Windows, macOS, Microsoft 365 (Outlook, Teams, SharePoint), Remote Desktop Tools

Microsoft 365 & Identity Management

Microsoft 365 (Outlook, Teams, SharePoint – learning & hands-on practice),
Entra ID (Azure AD – user/group management concepts, access control, MFA fundamentals)

Networking & Troubleshooting

TCP/IP, DNS, HTTP/HTTPS, VPN basics, API Testing (Postman)

Application & Cloud Support

REST/JSON Troubleshooting, Log Analysis, AWS (EC2, S3, IAM, CloudWatch), Vercel Deployment, Access Control

Tools & Collaboration

Jira Service Management (basic), ServiceNow (basic), Git, GitHub, Figma

Languages

English (Professional), Mandarin (Native)

PROJECTS

AI Resume Analyzer Platform | Technical Support & System Maintenance — | 2025 – Present

AWS Bedrock · Next.js · Server-side APIs · Vercel **Live demo:** portfolio-five-rho-81.vercel.app

- Provided end-to-end technical support for a live cloud-based application, ensuring system stability and resolving user-impacting incidents
- Diagnosed and resolved API integration failures caused by environment misconfigurations, restoring system functionality
- Performed root cause analysis using logs and system behavior across frontend and backend layers
- Investigated environment differences between local and production systems (Vercel), improving deployment reliability
- Monitored system performance and logs to proactively detect and prevent issues
- Managed deployment and access control, ensuring secure and stable system operation
- Handled multiple concurrent issues in a ticket-like workflow, prioritizing and resolving incidents efficiently

WORK EXPERIENCE

Product & Operations Analyst – Web Platforms

Shenzhen Skywise Technology Co., Ltd. | Aug 2019 – Mar 2023 | Shenzhen, China

- Acted as primary point of contact for customer-reported issues, diagnosing problems and coordinating resolutions with development and QA teams
- Investigated and troubleshooted web and mobile application issues, including UI inconsistencies, API failures, and unexpected system behavior
- Performed root cause analysis by analyzing system behavior, user interaction data, and application workflows
- Collaborated with developers to reproduce bugs, validate fixes, and ensure issues were fully resolved before release
- Supported full issue resolution lifecycle: user report → investigation → root cause analysis → fix validation → release confirmation
- Monitored system performance and user feedback using analytics tools, identifying anomalies and improving system reliability
- Translated user and business issues into clear technical requirements, improving communication between stakeholders and engineering teams

EDUCATION

Diploma in Interactive Design – Web Design and Development

SAIT (Southern Alberta Institute of Technology) | Calgary, AB | 2024 – 2025

Relevant coursework: Web Application Development, Database Programming, UI/UX, Web Security Fundamentals
