IT SUPPORT SNAPSHOT

- ✓ 4 years of customer-facing experience supporting users and resolving technical issues
- ✓ Built an enterprise Windows Home Lab (Windows Server, Active Directory, Microsoft 365 & Intune)
- ✓ ITIL® 4 Foundation & AWS Certified Cloud Practitioner
- ✓ Experience investigating incidents and collaborating with Product, Development, and QA teams
- ✓ Created troubleshooting guides, SOPs, and internal IT knowledge base documentation
- ✓ Hands-on experience supporting Windows environments, Microsoft 365, Active Directory, and endpoint administration.

PROFESSIONAL SUMMARY

IT Support Specialist with four years of experience supporting end users, investigating technical issues, documenting incidents, and collaborating with cross-functional teams to deliver reliable technical solutions.

Developed hands-on enterprise IT support skills through a Windows home lab, including Windows Server, Active Directory, Microsoft 365, Microsoft Intune, networking, and endpoint administration.

Recognized for structured troubleshooting, technical documentation, and a commitment to continuous learning. Currently preparing for the CompTIA A+ certification to further strengthen my hardware troubleshooting and desktop support skills.

CORE TECHNICAL SKILLS

Technical Support

- Windows 10/11 • Microsoft 365 Administration • Technical Troubleshooting • Technical Documentation • End User Support

Identity & Endpoint Management

- Active Directory • Microsoft Intune • Microsoft Entra ID • Device Enrollment • Group Policy

Networking

- TCP/IP • DNS • DHCP • VPN • Remote Desktop (RDP) • Printer Setup

Tools

- PowerShell • VMware Workstation Pro • ServiceNow (Basic) • Jira Service Management

PROFESSIONAL EXPERIENCE

Product & Operations Analyst

Shenzhen Skywise Technology Co., Ltd. | Shenzhen, China

Aug 2019 – Mar 2023

- Acted as the primary liaison between customers and internal Product, Development, UI Design, and Marketing teams, gathering user feedback, validating reported issues, and coordinating timely resolution.
- Investigated and reproduced user-reported website, account access, checkout, and application issues to validate root causes analysis and support timely resolution.
- Coordinated incident investigations by validating reported issues, providing customer follow-up, and tracking resolution progress to ensure timely communication throughout the support process.
- Developed and maintained incident documentation, troubleshooting guides, and internal knowledge base articles to improve issue resolution consistency and support knowledge sharing across teams.

- Explained technical findings and system updates to non-technical users, translating complex technical information into clear, actionable guidance.
- Collaborated closely with Product, Development, and QA teams to validate fixes, improve product quality, and enhance the overall customer experience.

TECHNICAL PROJECTS

Enterprise IT Home Lab

Windows Server 2022 • Active Directory • Microsoft 365 • Microsoft Intune • VMware

Representative Enterprise IT Support Scenarios
Self-directed Technical Project | 2025 – Present

Built and maintained an enterprise-style Windows environment designed to simulate real-world enterprise IT support operations. Developed and validated representative IT support scenarios while creating structured troubleshooting guides, SOPs, and technical documentation.

- Configured Windows Server 2022 and Windows 11 virtual machines, joined client devices to an Active Directory domain, and performed Microsoft 365 and endpoint configuration within a simulated enterprise environment.
- Diagnosed and resolved simulated Windows authentication and Active Directory access issues by validating account configurations and authentication settings.
- Investigated Microsoft 365 and MFA configuration issues by identifying synchronization and authentication misconfigurations within a self-built enterprise lab.
- Diagnosed DNS, DHCP, VPN, and Group Policy configuration issues within a simulated enterprise network, validating system settings, identifying misconfigurations, and verifying successful remediation.
- Used PowerShell to automate routine administration, investigate Windows event logs, and generate system reports for troubleshooting and verification.
- Created and published over 18 structured SOPs, troubleshooting guides, verification checklists, and technical documentation based on repeatable enterprise support scenarios.
- Validated user authentication, device enrollment, policy deployment, and endpoint configuration within the lab environment through structured testing and verification procedures.

CERTIFICATIONS

- ITIL® 4 Foundation — Incident Management, SLA, Service Lifecycle
- AWS Certified Cloud Practitioner (CLF-C02)
- AWS Certified AI Practitioner – Understanding practical AI applications for IT support, knowledge management, and customer service.
- CompTIA A+ (*In Progress – Expected 2026*)
